DaroBooks Page Guide

A practical overview of what each page is for and how to use it.

Prepared November 11, 2026

Use this guide to find the right part of DaroBooks. Public pages explain the product; account pages help you sign in and set up a workspace; dashboard pages support day-to-day bookkeeping and administration.

Access note: dashboard navigation and API access are controlled by account role and plan entitlements. A page may be hidden or show an upgrade/access message when it is not included. Super Admin pages are restricted to allowlisted super admins; the Support console is for support staff and super admins.

1. Public pages

These pages introduce DaroBooks or provide information before sign-in.

Home /
Introduces DaroBooks and links visitors to product information, pricing, and account creation.

Features /features
Explains the product's accounting and business features.

Pricing /pricing
Shows available plans, prices, and the feature modules configured for each plan.

About /about
Provides background about the company and product.

Who it's for /who-its-for
Describes the kinds of businesses and users DaroBooks is designed to serve.

Contact /contact
Lets visitors contact DaroBooks and find support channels.

2. Account and onboarding pages

Use these pages to create an account, regain access, and finish setup.

Sign up /signup
Create an account with name, email, password, and terms acceptance; then follow the verification and security setup steps.

Log in /login
Sign in with account credentials. Accounts with two-step verification must also complete the authenticator check.

Verify email /verify-email
Enter the email verification code sent to the account.

Two-step verification /two-step
Enroll an authenticator app or verify a code when prompted during sign-in.

Recovery codes /recovery
View and save one-time recovery codes for regaining access if the authenticator is unavailable.

Forgot password /forgot-password
Request a password-reset email.

Reset password /reset-password
Choose a new password using the reset link.

Workspace setup /workspace-setup
Set the company/workspace name and finish initial workspace setup; the company URL is generated by the system.

Unsubscribe /unsubscribe
Confirm an unsubscribe request using the link in a DaroBooks email.

3. Dashboard home and business operations

The dashboard sidebar groups day-to-day tasks. Most modules require the corresponding role permission and plan entitlement.

Dashboard home /dashboard
Review invoice and cash-flow summaries, recent invoices, and notifications. Switch companies when you have access to more than one.

Invoices /dashboard/invoices
Create and manage customer invoices; review statuses and balances, open invoice details, and download or send invoices.

New invoice /dashboard/invoices/new
Enter customer, dates, currency, line items, tax settings, discounts, and notes to create an invoice.

Invoice details /dashboard/invoices/[id]
Review a saved invoice, its amounts and status, and use the available actions to send, download, or update it.

Collections /dashboard/collections
Track customer collections and recurring invoice activity; review payment configuration where available.

Contacts /dashboard/contacts
Create and maintain customer and supplier records used by business workflows.

Items and stock /dashboard/items
Maintain products and services, SKUs, prices, tax settings, stock counts, and reorder points.

Item details /dashboard/items/[id]
Open an individual product or service record to inspect or edit its details.

Projects /dashboard/projects
Organize client projects, record time, track profitability, and create draft invoices from unbilled time.

Bills /dashboard/bills
Record supplier bills and monitor their approval, scheduling, and payment status.

Bill details /dashboard/bills/[id]
Review a specific bill and its available approval, payment, or status actions.

Requisitions /dashboard/requisitions
Submit and review spend requests as they move through approval stages.

Payouts /dashboard/payouts
Manage partner payout records and review payout summaries.

Payroll /dashboard/payroll
Record and review payroll runs and employee pay details.

4. Banking, accounting, and insights

These pages help reconcile cash, maintain accounting records, and review performance.

Banking /dashboard/banking
Import bank statements, review transactions, and reconcile them with business records.

Assist /dashboard/assist
Review and manage automation rules and suggested actions.

Ledger /dashboard/ledger
Work with ledger accounts, journals, and accounting-period review.

Assets /dashboard/assets
Maintain the fixed-asset register and review asset information.

Tax centre /dashboard/tax-center
Review tax settings and tax-related summaries such as VAT and withholding tax.

e-Invoicing /dashboard/e-invoicing
Review e-invoice readiness, provider/company settings, and filing status.

Reports /dashboard/reports
Select and review available financial reports for the workspace.

Budgets /dashboard/budgets
Create and review budgets, forecasts, and budget-versus-actual figures.

Group view /dashboard/group-view
Review financial information across business lines or grouped operations when enabled.

Practice /dashboard/practice
Manage client work in an accounting-practice workflow.

5. Workspace, settings, and support

Settings /dashboard/settings
Update security, team/member details, audit activity, tax and e-invoicing settings, company and invoice appearance, company URL, currency, billing, and data import/export.

Teams /dashboard/teams
Invite and manage workspace members and their company access, subject to team and user limits.

Team roles /dashboard/team-roles
Create or remove workspace-specific roles and choose which permitted features each role can access.

Approval flows /dashboard/approval-flows
Configure approval flows for supported workspace activities, such as requisitions or payroll.

Notifications /dashboard/notifications
Review personal notifications and mark them as read.

Knowledge base /dashboard/knowledge-base
Search published help articles. The support assistant uses published articles to answer customer questions.

Support /dashboard/support
Submit a support ticket, track its status, and start a support chat.

Support console /dashboard/support-console
For authorized support staff: triage conversations, reply or add internal notes, mark urgency, resolve cases, review unanswered questions and analytics, and request a 2FA reset for separate approval.

6. Super Admin pages

These pages are visible only to authorized platform super admins.

Users /dashboard/users
Create and manage platform users, assign roles, and handle user access.

Clients /dashboard/clients
Review and manage platform client/workspace records.

Roles and access /dashboard/roles
Configure platform roles and their feature permissions.

Notification management /dashboard/notifications
Configure platform notification settings and send announcements.

Tickets /dashboard/tickets
Review support tickets, update their status, and assign staff.

Knowledge base management /dashboard/knowledge-base-admin
Create, edit, publish, and remove help articles. Support-created drafts need review before publication.

Pricing /dashboard/pricing
Manage plan details, prices, included feature modules, limits, and activation.

Website settings /dashboard/website-settings
Manage public website details and branding, review integration status, and access permitted manual database backup.

7. Legal and policy pages

These pages explain product terms and policies; they are for review rather than bookkeeping actions.

Terms of service /terms
Read the relevant DaroBooks policy or agreement.

Privacy policy /privacy
Read the relevant DaroBooks policy or agreement.

Cookie policy /cookie-policy
Read the relevant DaroBooks policy or agreement.

Acceptable use policy /acceptable-use-policy
Read the relevant DaroBooks policy or agreement.

Data processing agreement /data-processing-agreement
Read the relevant DaroBooks policy or agreement.

Refund and cancellation policy /refund-and-cancellation
Read the relevant DaroBooks policy or agreement.

Security information /security
Read the relevant DaroBooks policy or agreement.

A simple way to get started

1. Create your account, verify your email, and complete two-step verification. 2. Set up the company workspace and currency. 3. Add contacts and products/services. 4. Create invoices and record expenses or bills. 5. Use Banking, Ledger, Reports, and Settings as your plan and role allow.

This guide describes the pages in the current application. Exact controls and available actions can vary by workspace data, account role, and plan configuration.
